# [insert name of MTD]

Developed by: [insert institution, partner, persons]

Date:

Type: [choose method, tool (model), device or combination of these]

Suitable for which mitigation measure (see list) and phase (planning, implementation, maintenance): [insert one or several options]

## Introduction:

*Describe the background and what the MTD is doing or can be used for.  How does it work? Why was it made the way it was? Include something about the theory behind, the scientific foundation, engineering etc. Include a picture or illustration suitable for giving the first impression of the MTD. ½ - 1 page*

## Application:

*How can the MTD be applied? If it is a method, we suggest including a flowchart of the process. If it as computer model, some pictures of for example model outputs can be included, as well as information about input data. If it is a device, include a picture of the actual device. If the application is very complex, make a simplified description here and include a reference to a more detailed description if it exists. Include examples of where the MTD has been applied, if possible (real life cases, laboratory cases, papers, etc.). Explain how it was used in this case and how well it worked. 1-2 pages*

## Other information:

*Include other relevant information. Costs of purchase, use, license etc can be added here.*

## References:

*Include all relevant references*

## Contact information:

*Include website, email or other ways of contacting the owner or developer of the MTD*
